

*Criteria:FY2013

CO₂ emissions

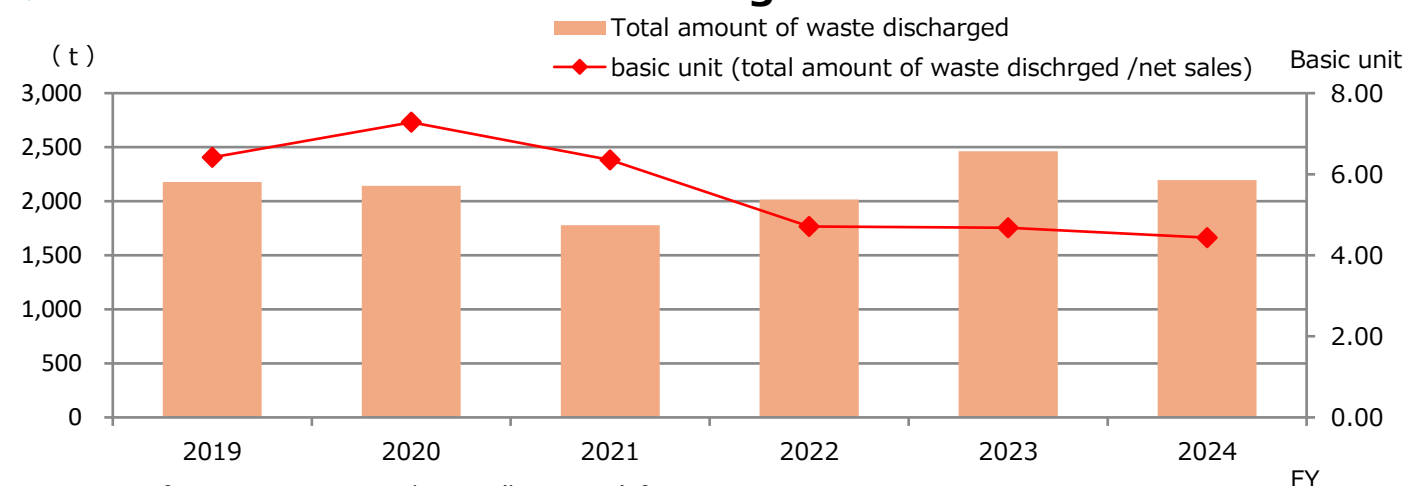

Target for FY2024: 62.0% reduction (basic unit) from FY2013

Results for FY2024: 31.5% reduction (basic unit) from FY2013

◆Target NOT achieved due to delay in converting to SF₆ gas substitute etc.

Total amount of waste discharged

*Criteria:FY2019

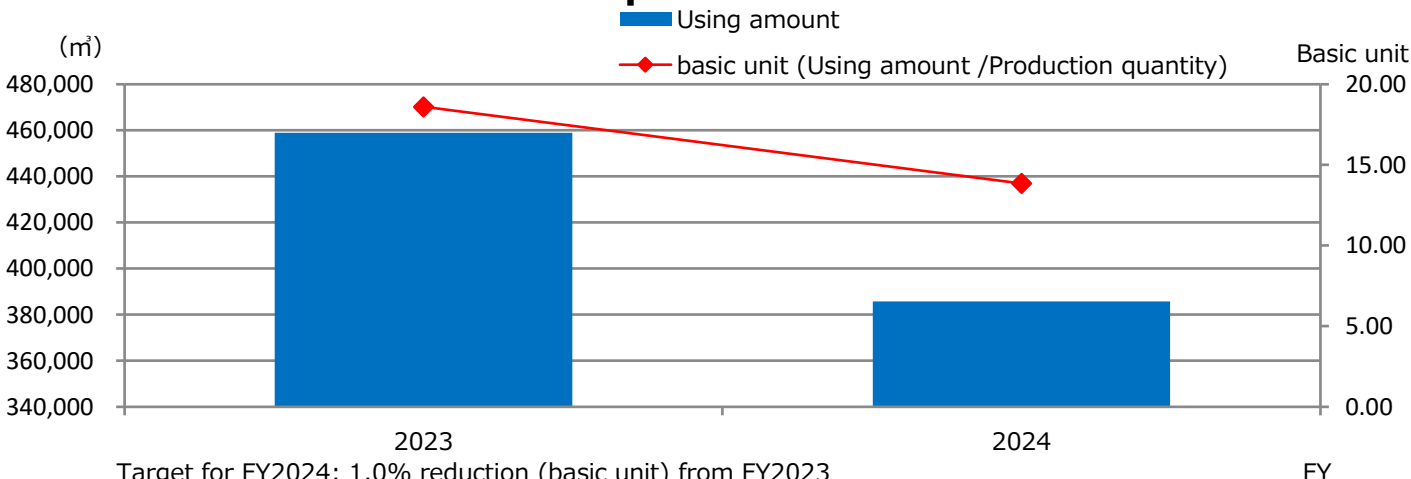

Target for FY2024: 8.6% reduction (basic unit) from FY2019

Results for FY2024: 30.9% reduction (basic unit) from FY2019

◆Target achieved due to the reduction of emissions through the rationalization of production and the promotion of recycling.

Water Resource Consumption

*Criteria:FY2023

Target for FY2024: 1.0% reduction (basic unit) from FY2023

Results for FY2024: 25.6% reduction (basic unit) from FY2023

◆Target achieved due to a decrease in water consumption resulting from measures to prevent water leakage from underground piping.

Prior to FY2022, total water usage was managed. From FY2023 onward, the management indicator was changed to water use intensity per production quantity.
